

Delegations arrival!

First impressions

I talked to **Szilveszter**, competitor from Hungary ...

- Hungarian delegacy arrived here first, how was your trip?

"We started from Budapest by train, then we switched trains and continue to Split, from where we drove to Primošten by car. It was a long journey, but by the time we win the medal it is all going to be forgotten :)."

- How many of you have already been on CEOI?

"Well, nobody was here before, or any CEOI as a matter of fact, so we count a little bit on the firsttimer's luck!"

... and **Vid**, competitor from Slovenia.

- Vid, I understood this isn't your first appearance on CEOI?

"No, it isn't for me and Patrik, last year we were competing on CEOI in Tata, Hungary. But it is the first CEOI for Žiga and Filip, my team mates."

- How did you do in Tata, and do you expect better standings in Primošten?

"In Tata we didn't accomplish anything! Nobody was too happy about it, but that also gave us a big advantage - this year we can only do better :)"

I really like those guys' attitudes, don't you?! :)

Last minute fine-tuning...

Evaluation Committee

Interview with **Bruno Rahle** - chair of Evaluation Committee

- *Even though you have attended all the informatics championships, as a competitor, and later on, as a member of Evaluation Committee, this is your first time being a chairman of Evaluation Committee. What is your main concern and duties of being a chairman?*

The most important thing is taking care of technical issues related to the evaluator and its system. The evaluator we are using this year, was made for purposes of CEOI in Vrsar, Croatia, 2006 and after few changes it was also used on IOI in Zagreb, Croatia, 2007. We have made a lot of improvements since than. Last few years I was doing most of the work and before me, there were Tomislav Novak and Marko Ivanković.

- *What was the latest improvement you've made?*

Well, the last one was C++ 11 support, but it hasn't been tested thoroughly yet, so we won't use it for this competition. However, I'm very satisfied with the rest of improvements, so for this competition we have one evaluator for web server and database, we have two workers for evaluating and running competitor's submissions. In case of main server crashes, (which most certainly won't happen! :) we have a copy of evaluator that backs up files from main server so there shouldn't be problems continuing with the competition. Evaluator system also has a print server so competitors could print their submissions. We use `gcc 4.7.2` and `FPC 2.6.0` for compiling the answers.

- *So, what are your past experience with workers?*

I have been managing this evaluator for the last 6 years, and, by now it has been proven to work excellent on competitions such as HONI and COCI (*Croatian Open Competition in Informatics*) and on Faculty of electrical engineering and computing for purposes of a class *Competitive programming*. Back in 2007, I had experience with workers as a competitor, but this is the first time I've decided to use this improved evaluator system on CEOI. I needed a day and a half to put all this together and make it work.

- *Thank you and good luck :)*
